Help your organization become resilient to phishing

20% clicks on phishing links and 10% casually shares data. The cost?

- ✗ Financial blunders due to fraud
- ✗ Damaged reputation due to data leaks
- ✗ Chaos due to ransomware

A community by your side

New types of phishing emerge every day. With our unique community of ethical phishers that develop a wide range of realistic phishing simulations, we help your employees to identify phishing quickly.
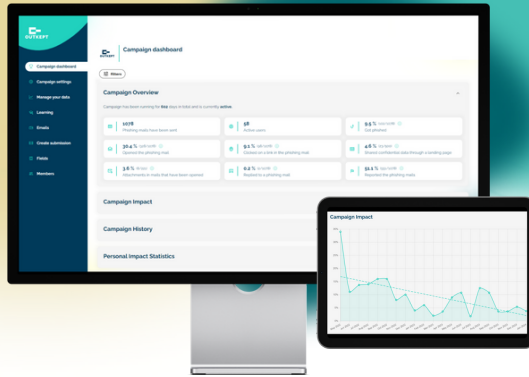

Our mission ?

Raising awareness in a sustainable way, to promote a culture of vigilance and knowledge within your organization.

"The way you work with a crowdsourcing system is really innovative and sets you apart from others."

"The templates come straight out of our own environment. This creates challenging emails which I have also been tricked by."

OUTKEPT

Ethical phishers on the front lines

Community driven

Rely on the expertise of a global community of ethical hackers creating realistic and up-to-date phishing simulations.

Automated convenience

Save time and resources with our platform that manages the entire phishing process, requiring no effort on your part.

Educational tool

Empower your team with immediate feedback and training to recognize and avoid phishing attempts in the future.

Integrations

Seamlessly connect to your Azure AD and Outlook, making the implementation and management of simulations easier than ever.

Live dashboard

Gain real-time insight into the resilience of your organization with our clear dashboard that shows crucial data and trends.

Local content

Ensure relevant and credible phishing simulations with content tailored to local trends and threats.
